ABOUT SES

From Ancient times, teachers and students have shared special bonds. There was a time when students' upbringing was done under guidance of guruji. In 1985, teachers and students (of Shivpati Post Graduate College) once again came together. This time for a social cause. Local act of safe drinking water gave birth to Shohratgarh Environmental Society (SES). It was started as a voluntary organization but passion & hard work of their founders gave it recognition. SES has been registered as society under *Society Registration XXI (1860)*. In all those years SES has worked at root level in villages. While working our workers have developed rapport with general communities, people of villages & others. They call the organization "Paryavaran Samiti" (Environmental Society) Calling it paravaran samiti by people shows its universal appeal & acceptance of common people. Though by name it looks that our organization works only for area concern with environmental issues but that is not true. As an organization SES knows its responsibility towards society & worked in different arena of social sector. It is sustainable agriculture, health, disaster management, livelihood, education, empowerment of women. SES helped people to raise their voice in form of advocacy. In last 24 years, Karmbhoomi (Operational area) of society is Uttar Pradesh. As a democratic organization, SES has always emphasized on approach of people participation whether it was issue of women empowerment or livelihood. There were people who fall under poor, deprived & marginalized section of society. SES has undertaken development initiatives and help those people to come out of poverty, earn their livelihood. Yet, there are lot of BPL people & people who earn less than \$1 daily. Without being complacent, we as SES, are determined to improve standard of life of such people. Once identified as member of BIMARU state, Uttar Pradesh is still one of the poorest states of India. District Siddharthnagar (where SES has registered office) is one of the poorest parts of Uttar Pradesh. Agriculture is main source of employment & income. Statistics of government show that agriculture contribution in GDP has reduced significantly. Due to which, majority of farmers pushed in small & marginal category which also affect their standard of life, health & education too. It is one of the reason that SES is working in area with people of those areas. It is said that actions are mightier than words. Activities, efforts of SES have given it the golden opportunity to work with Ministry of Environment & Forests, Government of India. It has been appointed as Regional Resource Agency of Uttar Pradesh for their programme NEAC (National Environment Awareness Campaign). In year 2000, SES has got good category as RRA. Under NEAC programme, we are covering 28 districts. SES is fortunate that it is working with hundreds of NGO under this programme.

HOPE (*HELPING ORPHANS BY PROVIDING EDUCATION & EMPOWERMENT*) is initiated by Shohratgarh Environmental Society [SES]. The focus of programme is on empowering orphan by providing education with support of community worldwide. Please help those children. For more details, visit <http://sesindia.org>.

CLIMATE CHANGE & FOOD SOVEREIGNTY

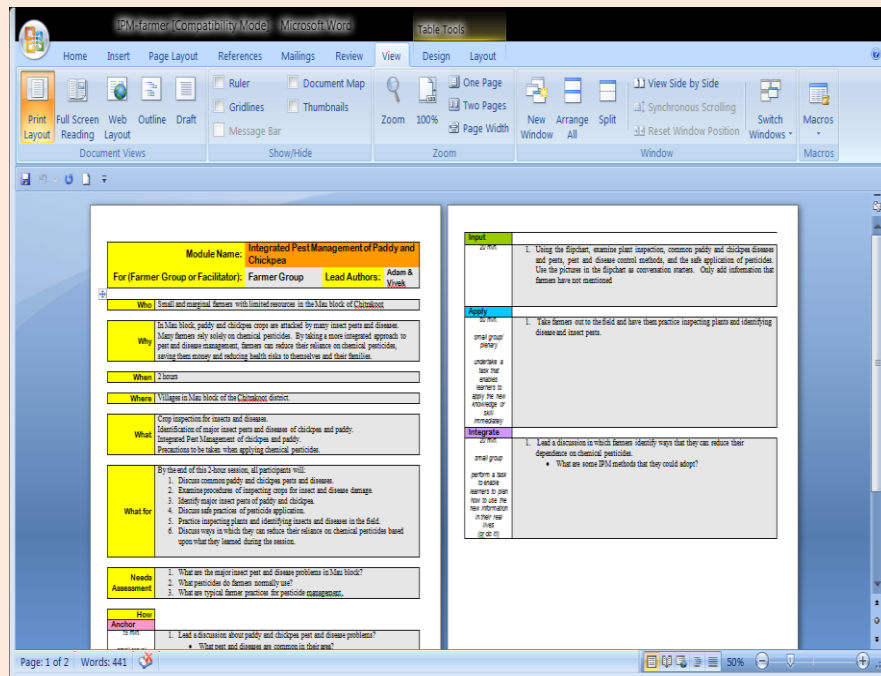

Food Sovereignty
 Food sovereignty is the right of peoples to healthy and culturally appropriate food produced through ecologically sound and sustainable methods, and their right to define their own food and agriculture systems. It puts the aspirations and needs of those who produce, distribute and consume food at the heart of food systems and policies rather than the interests of corporations and investors.

In Recent years, thousands of farmers in India have committed suicide because their dignity is violated. Farmers are the most dignified people in this world. They produce with their mind, soul and body. A farmer would rather defend his dignity with his death than lose it through the dehumanization that comes with loss of control of production methods and loss of control over his own life. Climate change, agro-chemicals, pesticides, and the undermining of food sovereignty of millions of people and both need to be combated. They both take away a basic human right - the right to adequate food. There are two immediate concerns in the context of the 2009 World Food Summit. The first is the increasing number of weather patterns. The first is the increasing number of natural disasters. The second is the issue of food sovereignty. Food sovereignty includes the ability and power of a country or community to produce and consume food. It is the right to food production. Food sovereignty means the right of people and the community over land and forests which would enable them to control the sources and means of production. There is a decrease in food production in many countries, particularly among

PUBLICATIONS: *Echo SES*- a quarterly newsletter published by Shohratgarh Environmental Society. It focuses on various social & developmental problem & search for long lasting solutions.

In year 2009, a student team from **CORNELL UNIVERSITY** (UNITED STATES OF AMERICA) & **GB PANT** University (Pantnagar, India) has visited the target area in Campierganj block. The Cornell/GB Pant team interviewed farmers in the village & developed module for: Health & Nutrition Seed production, Seed storage, Composting. In 2010, students from GB Pant University again visited targeted area & develop few models on livelihood & agriculture.

In left you can see module developed by team on integrated paste management paddy & chickpea.

Below in the picture of student visited Campierganj in year 2010 for study.

STUDY VISIT

In December 2010, students of Agri Business Management Programme, IIM Lucknow conducted the a field research visit to various villages in Campearganj Block of Gorakhpur district with the following objectives:

1. To study the effectiveness of the various initiatives launched by NGOs, government schemes, SHGs etc. especially that of our [SES] System of rice intensification (SRI) and System of Wheat Intensification (SWI).

2. To analyze and study the various factors those cause/hinder the development of villagers especially farmers.
3. To study the brand preference in the various product categories of the rural buyer.

IMPACT

THE CURIOUS CASE OF BASHEER AHMED

In Movie “Cast Away”, a FedEx employee Chuck Noland who is stranded on an uninhabited island after his plane crashes on a flight over the South Pacific Sea. The film depicts his attempts to survive on the island using remnants of his plane's cargo, as well as his eventual escape and return to society. Life of Basheer Ahmed is nonetheless like Noland. 68 years, Basheer Ahmed Lives in Harkoli Village of District Siddharthnagar (U.P.). From Last Six Decades, He was struggling for his basic needs. Every year, the fury of River Burhi Rapti jolts his dream to live. Though, Not Stranded like Noland on a barren island but fulfilling needs of their seven family members’ looks herculean task for Basheer. In country of cultural diversity where indicator of economy lies in urban India and electoral system depends on rural area, 3 bigha land is not sufficient for Basheer. Every year, His family has to leave his home and make a temporary home on roads.

In this region, usually two major crop cycles are grown - Wheat (Rabi) & Paddy (Kharif). Bashir grows Rabi crop in November and harvest during the end of April while Kharif crop starts after two months gaps from July and harvested till the middle of November. Due to good soil in this area and good rainfall paddy is very ambitious for farmers like Basheer. The best time for harvesting is between 15th August to 15th September. Every year, before growing a crop, Basheer has a hope but a fear too. Fear of Flood, Fear of losing crops and fear of not having two time meals. Only source of income was crop of Rabi and working as labourer. Earlier, His input was Rs. 1500 and get output of Rs. 5000 from wheat. Shohratgarh Environmental Society, a Leading NGO in this area helped Basheer to improve his standard of Life. They appease Basheer to try NDR-97 (A variety of paddy from acharay Narendra Dev agriculture University, faizabad) . NDR is short duration (90-100 days) crop. SES has support him with technical input like time line from sowing to harvesting, irrigation & quantity & use of fertilizer. It is called early paddy. Its nursery developed between 1st to 15th may. Due to appropriate condition, crop is harvested before advent of flood. With showing early paddy in one bigha, he has to invest Rs. 1500 & earn profit of Rs. 4500. Thus, his income from early paddy crop was Rs.13500 from three bigha. Now, Basheer become intelligent and he asked what we can grow after field is being vacant after 15th august. SES advised him to start sowing cash crop. During those two vacant months, he sowed mustard with investment of Rs. 300, Income was Rs. 2200/bigha. He also started practising potato, tomato, brinjal & sugar cane. Thus early paddy income & other cash crops boost up his income without affecting wheat sowing schedule.

The best thing about Basheer is his curiosity to learn. SES gave him hope to old shoulder of Basheer. In his own words *“It has become our way of life and I thought I will pass my whole life in the same way, there was no hope or method to combat inundation.”* He is now active member of Grain bank. This grain banks supports during emergency as well as lean period of poor and other deprived people. He is also a member of AAS (AAJIVIKA ADHIKAR SAMITI- *Livelihood Right Committee*), an initiative of SES. AAS comprises of different CBOs which do advocacy at different level and enthusiastic Basheer not only play important role for his fellow farmers and neighborhood villages but also show them way .The difference between reel character Noland and Basheer is – Noland returns after 4 years to society but Basheer took sixty years to return to the society where he lives - A society where he has his say, where his next generation can have a good life.

WORK OF SES IN NEWS

EVENTS ORGANISED BY SES

ACHIEVEMENTS OF SES IN LAST TWO DECADES

INSTITUTION

In last two decades, SES has developed various kind of institution, Currently, there are Self Help Groups, Disaster Management Committee, Farmers Field School, Grain Bank, Seed Bank, Sangh, Mahasangh.

No. Of SHG- 200

No. Of DMC- 30

No. Of Farmers Club- 30

No. Of Grain Bank- 40

No. Of Seed Bank- 10

No. Of Farmers Field School- 6

No. Of Federation-1

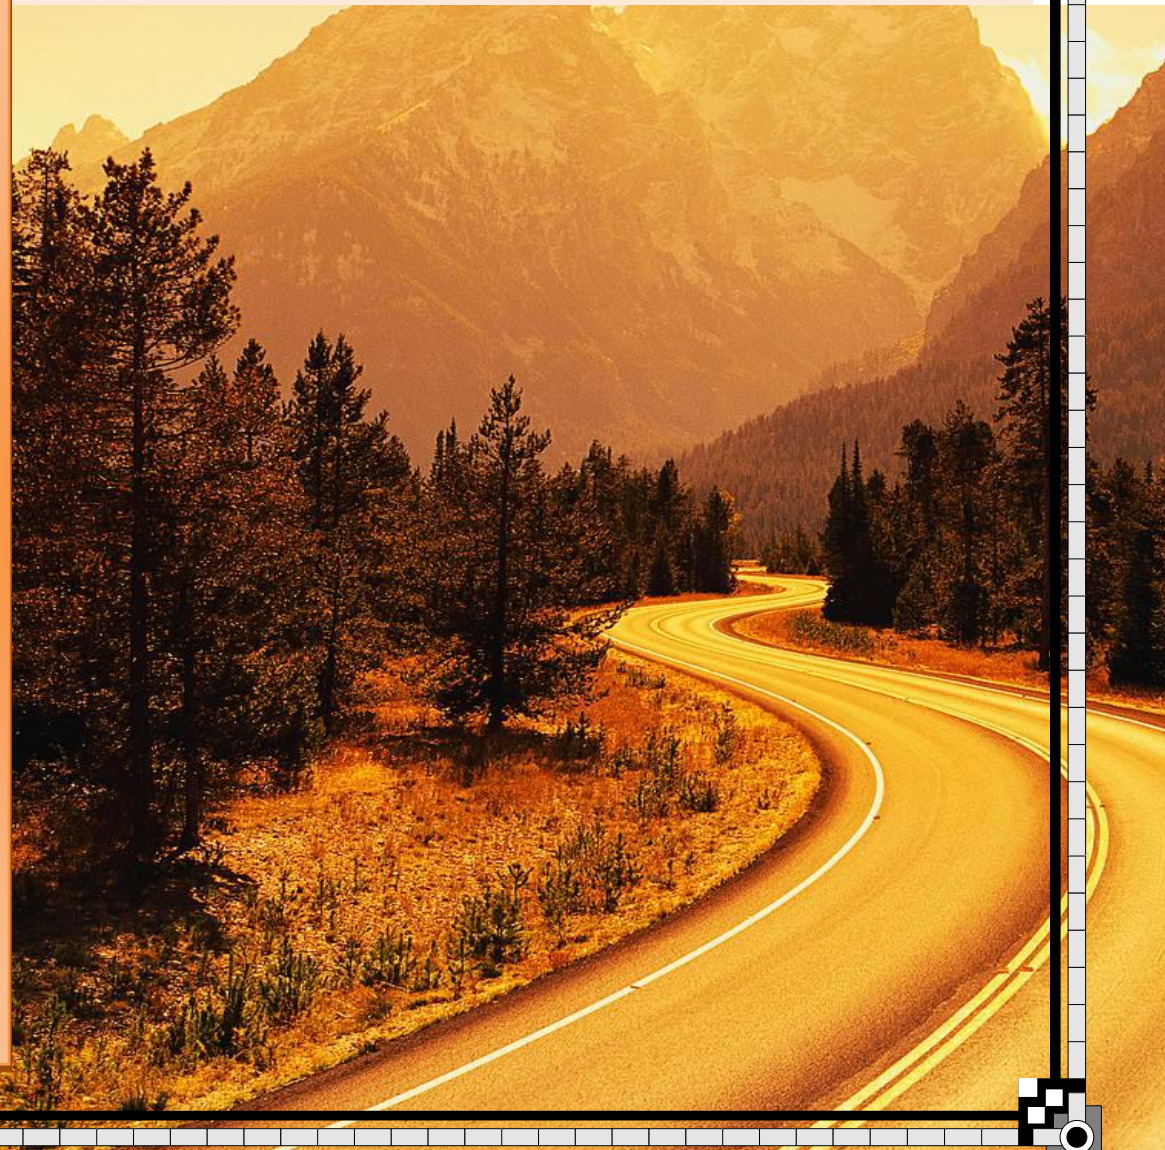

- Nominated As Regional resource agency from last 16 years by Ministry of environment & forests under NEAC programme.
- 30000 women were literated under Accelerated female literacy in year 2001-02.
- Provided 125 Nadep and padel pump for vegetable growing which enhanced the productivity by 20 % & ultimately increase income of farmers .
- Develop a strong networking among thousand of NGOs.
- Change in cropping pattern in flooded area which enhanced income of farmers
- Two time meals to 400 families through grain bank in Jogia block
- 1872 women of different SHGs got opportunity to increase their income
- Established as a learning institution where people worked & later started their own NGOs.
- Activated – Mother Group & Villege Health & Sanitation Committee at villege level

THE ROAD AHEAD

SES HAS STARTED WORKING IN YEAR 1985. IT HAS BEEN 25 YEARS AND HAS WORKED ON VARIOUS SOCIAL & DEVELOPMENTAL ISSUES. STILL, SES FEELS THAT THERE ARE LOT OF WORK HAS TO DO IN VOLUNTARY SECTOR:

- IMPROVENT IN LIVELIHOOD CONDITION & LIVING OF STANDARD OF DEPRIVED PEOPLE.
- DEVELOPMENT OF LINKAGES WITH GOVERNMENT DEPARTMENT FOR SMOOTH EXECUTION OF PROGRAMME.
- IN CHANGING CLIMATE SCENARIO, WORK ON ISSUE WHICH ARE UNEXPLORED BUT VERY CRUCIAL TO MANKIND & THEIR LIFE.
- IN VOLATILE VOLUNTARY SECTOR, ORGANISATION NEEDS TO DIVERSIFY ITS APPROACHES AS WELL AS EXPAND ITS REACH.
- ALSO INTERESTED TO WORK IN FIELD OF RESEARCH SO SOLUTION TO ANY PROBLEM CAN PROVIDE EASILY.
- CAPACITY BUILDING OF COMMUNITY, SO THEY CAN UNDERSTAND THEIR PROBLEM & ABLE TO SOLVE IT.
